Assessment of Safety Processes in the Community

Hospital Setting

James G. Anderson, PhD
Ranga Ramanujam, PhD
Kathleen Abrahamson, RN, MA
Trisha Palmer
Ganesh Kak

Objectives

Identify current processes for tracking errors

Show areas for improved safety and efficiency

Assess staff knowledge and attitudes toward patient safety

Method

Interview key patient care personnel

Survey of nursing staff

Comprehensive evaluation of past incidents

Development of staff training program

How can current information flow be improved to reduce medical errors in the community hospital setting?
