

Biometrics and E-Authentication

Matthew R. Young, Shimon K. Modi, & Stephen J. Elliott, Ph.D., Biometric Standards, Performance, & Assurance Laboratory, Department of Industrial Technology

Motivation

- >Address needs of E-Government Initiative, Office of Management and Budget Guidance and NIST **Electronic Authentication Guideline**
- Take advantage of biometrics-based authentication
- > Increase entire Internet security architecture by combining multiple technologies

AHGBEA Participation

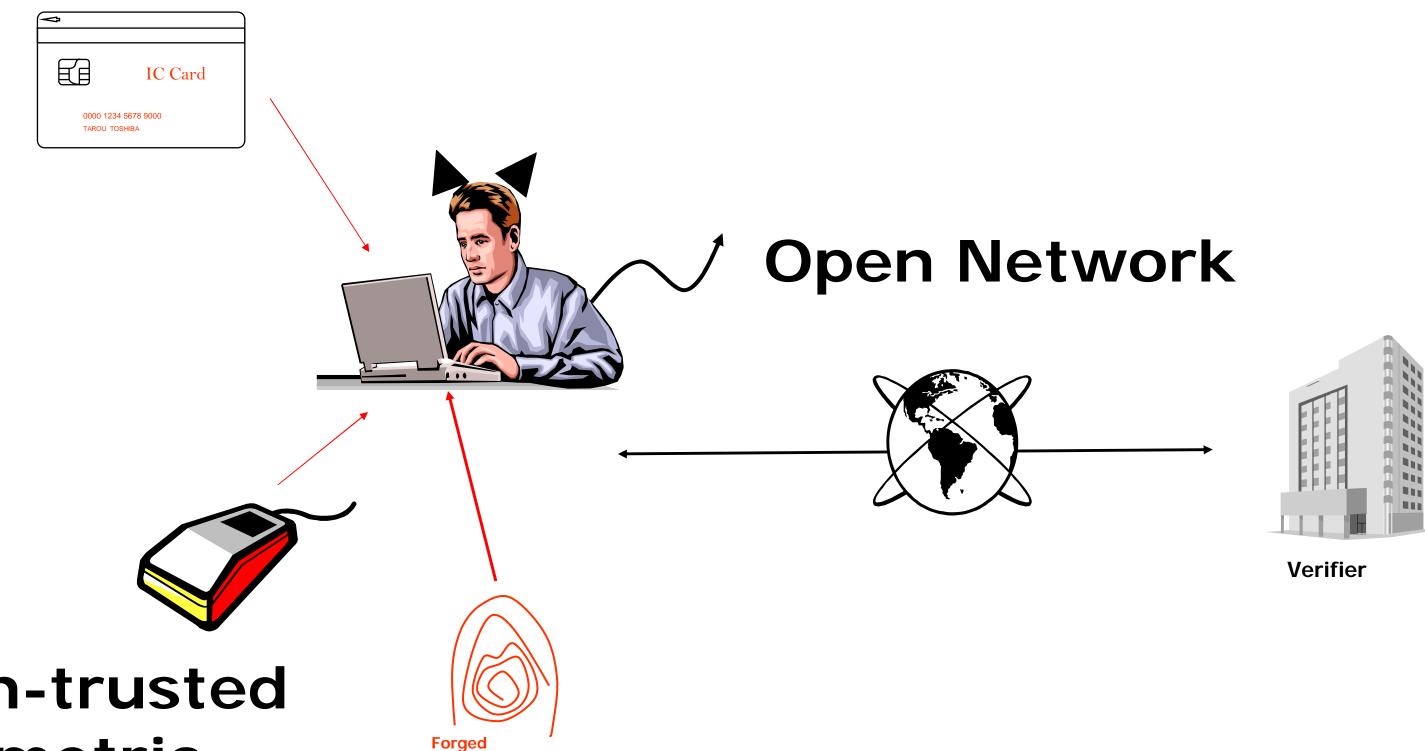

The BSPA has made 13 contributions to AHGBEA in the following areas:

Biometric System Architectures Biometric System Threat Model Biometric System Security Issues Biometric Identifier Revocation Peer Review of Biometric Authentication

Challenges

NIST SP800-63: "Biometrics do not constitute secrets suitable for use in the conventional remote authentication protocols"

Falsified template

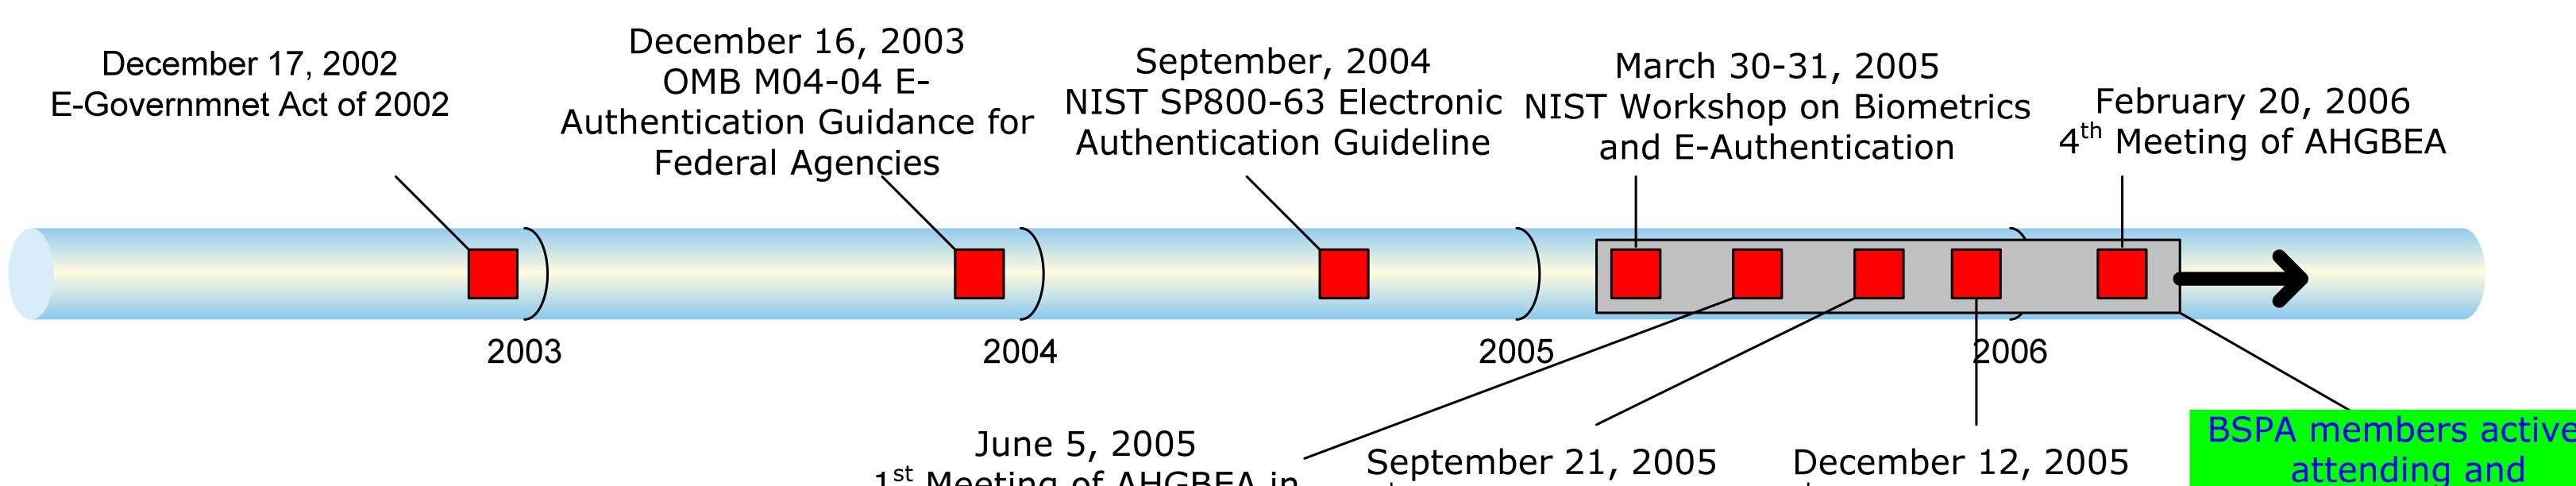

Non-trusted biometric device

Forged raw data

contributing

Timeline

/ September 21, 2005 December 12, 2005 1st Meeting of AHGBEA in 2nd Meeting of AHGBEA 3rd Meeting of AHGBEA response to NIST Workshop
