

# ReAssure

Michael Yang Patrick Perrone Forrest Fleming  
Pascal Meunier Jan Vitek

Save topographies locally or in the ReAssure database

Exchange topographies with other users

Use the minimap to view the entire topography and zoom to a location

Easy click and drag configuration of nodes, edges and VLANs

Edit VLAN and PC properties

Easily distinguishable visual representations

Resizable sidebar

Scrollable display

A reconfigurable facility for efficient, reproducible, controlled and safely contained experimentation.

Allows: for experimentation with and analysis of potentially dangerous software or procedures while maintaining overall **security through containment**.

Assists: the configuration of **user-defined** topographies.

Provides: a **versatile** environment to run standard operating systems from VMWare images.
